

Professional Power Amplifier

DSD800/1800/3200/4000

Professional Digital Power Amplifier

Characteristic :

- Applies the classical PWM circuit design and new technology protection circuit.
- Applies excellent power-supply design, reliable circuit, high efficiency and low distortion.
- New modulation mode helps to taking sample of extremely small signal, to improve and perfect the method of sampling.
- High switch mode frequency, precise controlling of dead-time, makes the distortion of the amplifier much lower, the sound quality reaches and even passes the traditional transformer amplifier.
- It has high reliability and applicability, big dynamic range, small size, light weight, high efficiency, low distortion, big output power, etc.
